

IN THE CLAIMS

Please cancel Claims 3-18, 20, 22, and 24-50, without prejudice or disclaimer of subject matter. Please amend Claims 1, 2, 19, 21, and 23 and add new Claims 51-54, as indicated below. The following is a complete listing of claims and replaces all prior versions and listings of claims in the present application:

1. (Currently Amended) A digital broadcast receiving apparatus comprising:
 - means for setting a digital broadcast program and a print reservation of partial content which is provided in the program and can be displayed on a display when the program plays, in advance;
 - means for receiving a digital broadcast of the program;
 - judging means for judging whether or not the received digital broadcast includes information related to the set partial content;
 - means for extracting the partial content information when said judging means judges that the received digital broadcast includes the information;
 - judging means for judging whether or not extracted partial content includes an information part print-output of which is not permitted; and
 - printing means for print-outputting the extracted partial content, information without intervention of a user while receiving the digital broadcast
 - wherein the printing means print-output only that portion of the extracted partial content other than the information part when the judging means judge that the extracted partial content includes the information part.

2. (Currently Amended) A digital broadcast receiving apparatus, connected to printing means for print-outputting information provided by digital broadcasting, comprising:

means for setting a digital broadcast program and a print reservation of partial content which is provided in the program and can be displayed on a display when the program plays, in advance;

means for receiving a digital broadcast of the program;

judging means for judging whether or not the received digital broadcast includes information related to the set partial content;

means for extracting the partial content information when said judging means judges that the received digital broadcast includes the information;

judging means for judging whether or not extracted partial content includes an information part print-output of which is not permitted; and

output means for outputting print data of the extracted partial content information to ~~[[said]]~~ the printing means, wherein the output means output only the print data of the extracted partial content other than the information part when the judging means judge that the extracted partial content includes the information part without intervention of a user while receiving the digital broadcast.

3. - 18. (Canceled)

19. (Currently Amended) A digital broadcast receiving method

comprising:

a step of setting a digital broadcast program and a print reservation of partial content which is provided in the program, in advance;

a step of receiving a digital broadcast of the program;

~~a judging step of judging whether or not the received digital broadcast includes information related to the set partial content;~~

a step of extracting the partial content information when it is judged in said ~~judging step~~ that the received digital broadcast includes the information;

a step of judging whether or not extracted partial content includes an information part print-output of which is not permitted; and

a printing step of print-outputting the extracted partial content information without intervention of a user while receiving the digital broadcast

wherein only that portion of the extracted partial content other than the information part is print-output in the printing step when it is judged in the judging step that the extracted partial content includes the information part.

20. (Canceled)

21. (Currently Amended) A computer-readable recording medium on which a computer program for receiving digital broadcast is recorded, ~~[[said]]~~ the computer program including:

code of a step of setting a digital broadcast program and a print reservation of partial content which is provided in the program and can be displayed on a display when

the program plays, in advance;

code of a step of receiving a digital broadcast of the program;

~~code of a judging step of judging whether or not the received digital broadcast includes information related to the set partial content;~~

~~code of a step of extracting the partial content information when it is judged in said judging step that the received digital broadcast includes the information;~~

~~code of a step of judging whether or not extracted partial content includes an information part print-output of which is not permitted; and~~

~~code of a printing step of print-outputting the extracted partial content information without intervention of a user while receiving the digital broadcast~~

~~wherein only that portion of the extracted partial content other than the information part is print-output in the printing step when it is judged in the judging step that the extracted partial content includes the information part.~~

22. (Canceled)

23. (Currently Amended) A digital broadcast system ~~having~~ comprising a transmitting apparatus for transmitting digital broadcast and a receiving apparatus for receiving digital broadcast, wherein [[said]] the receiving apparatus comprises:

means for setting a digital broadcast program and a print reservation of partial content which is provided in the program and can be displayed on a display when the program plays, in advance;

means for receiving a digital broadcast of the program;

judging means for judging whether or not the received digital broadcast includes information related to the set-partial content;

means for extracting the partial content information when said judging means judges that the received digital broadcast includes the information;

judging means for judging whether or not extracted partial content includes an information part print-output of which is not permitted; and

output means for outputting print data of the extracted partial content to the printing means, information without intervention of a user while receiving the digital broadcast

wherein the output means outputs only that portion of the print data of the extracted partial content other than the information part when the judging means judge that the extracted partial content includes the information part.

24. - 50. (Canceled)

51. (New) The digital broadcast receiving apparatus according to claim 1, wherein the printing means print-output a screen image of the extracted partial content to be displayed, and the printing means print-output an image other than the information part from the screen image when the judging means judge that the extracted partial content includes the information part.

52. (New) The digital broadcast receiving apparatus according to claim

2, wherein the output means output print data of a screen image of the extracted partial content to be displayed, and the output means output print data of an image other than the information part from the screen image when the judging means judge that the extracted partial content includes the information part.

53. (New) The digital broadcast receiving method according to claim 19, wherein a screen image of the extracted partial content to be displayed is print-output in the printing step, and an image other than the information part from the screen image is print-output in the printing step when it is judged in the judging step that the extracted partial content includes the information part.

54. (New) The recording medium according to claim 21, wherein a screen image of the extracted partial content to be displayed is print-output in the printing step, and an image other than the information part from the screen image is print-output in the printing step when it is judged in the judging step that the extracted partial content includes the information part.
